The Bank Draft

The bank draft is merely a check by one bank on another. Banks check against each other, as you check against your bank. One bank has an account with another-a bank in a larger city. Its drafts are merely checks against the money deposited with the city bank.

The draft is the safest way to send money through the mails, no matter to what part of the world. It is the best method to carry money on your person if you are taking a trip. The draft will be appreciated by the persons at the other end because there is less chance of any inconvenience in getting the money.

At your end of the line there is also greater assurance that should any loss occur in the draft's transmission, you will be saved any red tape or delay in making the amount good.

Buy a bank draft always. We protect our customers against loss and give you opportunity to deal with first parties.

A Savings Bank Department is a feature of this Bank, in which interest at the rate of four per cent per annum is allowed.
